

Trinity Historical Society Genealogy Files

The family histories within these files originate from three sources: [1] students who worked under a Youth Service Canada grant from Human Resources Development Canada, Clarendville, compiled a number of the family trees; [2] members of the Historical Society who have completed research on their own families or on families living in Trinity or the surrounding communities and [3] the remainder are the personal research of individuals who have donated copies of their research to the archives.

The archives currently have genealogy files on the following surnames:
